

I am a subscriber to XM radio and I encourage all of my co-workers to make an investment in subscribing to XM satellite radio. The reason I am so impressed with satellite radio is because I don't have to listen to what the National Association of Broadcasters want to shove down my throat. I am very tired of Citadel Communications trying to force their agenda down my throat and that is one of the only stations I can receive when I travel frequently to some of the deepest rural areas in the State of New Mexico. I respectfully urge you the FCC to reject the NAB'S Petition 04-160 and please support XM's ability and RIGHT to provide me with a signal where there are none. This is a service I definitely need.

Respectfully submitted,

Jerry Hatley
